[info@duale-medizin.de](mailto:info@duale-medizin.de)

**Important: The following test is necessary for our first assessment of your thyroid condition. We often need this information for the first appointment.**

Over a period of three days, please measure your body temperature every morning **before** getting up and by using - preferably - a mercury thermometer under your armpit. Please do not drink any alcohol the evening before.

This test is not applicable for women taking anti-baby-pills as it increases their body temperature. (Attention: a digital thermometer often switches off automatically before the temperature has been measured properly. In this case, leave the thermometer under the arm otherwise the measurement is too short.)

First day:.....°C    Second day:.....°C    Third day:.....°C

**Please understand that the first appointment with us will last 1 - 1.5 hours. If you need to cancel the appointment, please inform us at least 24 hours in advance. Otherwise we will have to charge you privately for the full time.**

**We are looking forward to your visit!**

**Your Practice Team**
